EXPERIENCE

TEXALA INDIA PVT LTD | React js Developer
Feb 2022 – Aug 2023 | Pune, Maharastra

- Developed and maintained Admin and Customer Modules for Solar CRM single page application using ReactJs.
- Integrated backend APIs and managed global state using Redux.
- Used socket programming to handle real-time communication with the backend.
- Worked alongside of senior team members to acquire valuable insights about creating scalable application that uses the idea of separating concerns and multi-layered architecture in order to improve code quality and avoid duplication.
- Revamped legacy code to use the latest react hooks which led to shorter code and optimized performance.

REPLICON SOFTWARES | Associate
Aug 2018 – Dec 2020 | Bangalore, Karnataka

- Collaborated closely with UX/UI designers to implement responsive and visually appealing interfaces that improved overall user engagement.
- Demonstrated strong problem-solving skills, addressing and resolving frontend-related issues efficiently, thereafter achieving a 93% satisfaction rate.
- Utilized version control systems, such as Git and GitHub, to manage collaborative coding efforts within the development team.

SIDE PROJECTS

UNIQUE NOOK | Github Link
Tech Stack: MongoDB , ExpressJs, Node Js, REACT Js

- Designed and developed a Full stack E-Commerce Application to purchase clothes.
- Created separate User-facing module and Admin module.
- Added user authentication and role-based authorization using JSON web tokens.
- Features include user placing orders, payments using Stripe Payment, paginations, etc.

DASHCRAFTED | Github Link
